

SonicWall Product Line: At-A-Glance

SONICWALL®

Next-Generation Firewalls

High End: NSsp Series

Firewalls are designed for large distributed enterprises, data centers and MSSPs, offering high-speed protection, high port density and up to 100 Gbps firewall inspection throughput.

Mid-Range: NSa Series

Industry-validated security effectiveness and performance for mid-sized networks, branch offices and distributed enterprises.

Entry Level: TZ Series

Integrated threat prevention and SD-WAN platform for home, small/medium organizations and SD-Branch deployments.

SOHO & MicroSMBs: TZ80

Best-in-class threat protection for your small office, home office, IoT, and MicroSMBs, with easy cloud management for remote deployments.

NSV

Virtual: NSv Series

Virtual firewalls with flexible licensing models to shield all critical components of your public and private cloud infrastructure.

SonicWall firewalls include DNS and reputation-based content filtering to block malicious websites and applications, and help guide policies on web content display using reputation scores. Expanded storage for audit files, Network Access Control (NAC) integration and automated updates increase ease-of-use.

SonicWave Series

Advanced security, performance and scalability enhanced by Wi-Fi 6 support, managed through the cloud with SonicWall Wireless Network Manager or Network Security Manager.

SMA Series

Simple, policy enforced secure access to network and cloud resources.

SonicWall Switch

Delivers intelligent switching for next-generation secure connectivity of SMB and SD-Branch deployments.

Capture Security appliance (CSa)

On-premises file testing and malware prevention.

Management, Reporting & Analytics

SonicWall Unified Management

Network Security Manager

Wireless Network Manager

Manage firewalls, wireless, and switching from one platform with centralized visibility, real-time insights, and automated workflows that simplify operations and strengthen security.

Capture Client

An easy-to-deploy unified client powered by a dual engine that delivers layered defenses and enterprise-grade threat prevention and protection, all while streamlining management silos. Secure endpoints both on-prem and off networks seamlessly.

Cloud Secure Edge

SonicWall Cloud Secure Edge (CSE), formerly Banyan Security, is an easy-to-adopt Security Service Edge (SSE) solution, enabling your workforce to access any resource from any device securely. It delivers simple, secure, zero-trust access to private and internet resources for all your employees and third parties, regardless of their network location. To accomplish that, CSE combines the functionality of multiple traditional network appliances – remote access VPN, web proxy, firewall, etc. – into a unified cloud-delivered solution, improving the security posture and user experience for the entire workforce.

SonicWall Product Line: At-A-Glance

SONICWALL®

SonicSentry MXDR

Provides the power of a 24/7/365 expert SOC behind endpoint, cloud, and network for monitoring and incident response across the attack surface.

For endpoint monitoring, we support several NGAV/AV options including Capture Client, Sentinel One, Aurora Endpoint Defense, Windows Defender, and Sophos.

Network device monitoring can be applied to any firewall, switch, server, or other device from any maker.

Cloud and identity monitoring can stop bad logins, admin escalations, and MFA anomalies across Microsoft 365, Google Workspace, Slack, Salesforce, and more.

Cloud Email Security is available both with and without SOC monitoring to prevent phishing emails from ever reaching users' inboxes.

Next-Gen Firewall Subscription Services

Essential Protection Service Suite

provides all essential security services needed to protect against known & unknown threats. This includes Capture Advanced Threat Protection with RTDMI Technology, Gateway Anti-Virus, Intrusion Prevention and Application Control, Content Filtering Service, Comprehensive Anti-Spam Service, Network Visibility, Cloud Management and Orchestration, Report Summary, and 24x7 Support.

Advanced Protection Service Suite

provides advanced security for the network. This bundle includes essential bundle services along with cloud management and cloud-based reporting for 7 days with cloud-based reporting and analytics for 7 days.

Managed Protection Service Suite

includes all Advanced Protection service offerings plus extended Reporting & Analytics for 30 days, and firewall management services including monitoring & firmware upgrades.

Embedded Cyber Warranty

All service suite bundles include embedded cyber warranty that runs up to USD \$200,000. The warranty is offered to mitigate costs of security breach, meet compliance requirements and promote peace of mind.
