

**BRIEF**

# Sysdig Platform Architecture

Unified security and compliance for containers, Kubernetes and cloud

## Why Sysdig

Single view of risk with no blind spots

Prioritize what matters with no guesswork

Fix once at the source with no wasted time

### Multi-Cloud Support

### SaaS First Platform

Three availability zones in the U.S. and Europe

## How It Works

“ We’ve instrumented Sysdig into our pipelines where it is executing container vulnerability and compliance checks. Those automated checks allow us to move faster.”

- Director Engineering, SAP Concur

## Key Use Cases

### Cloud Security

- Infrastructure as Code Security
- Cloud Security Posture (CSPM)
- Cloud Identity & Access Management (CIEM)

### Container/K8s Security

- Vulnerability Management
- Kubernetes Security
- Runtime Security
- IR & Forensics
- Compliance
- Network Security
- Threat Detection and Response

### Monitoring

- Kubernetes Monitoring
- Troubleshooting
- Prometheus Monitoring
- Custom Metrics
- Cloud Monitoring

### Highlighted Customers
