Trellix Collaboration Security

Collaborate confidently with adaptive, automated security for email and collaboration tools.

Secure and agile teamwork

Trellix Collaboration Security provides protection against high-volume exposure points and attackers, enabling secure and agile teamwork.

Adapts, detects, responds
Dectects and blocks suspicious email and collaboration data through real-time analysis of attachments, URLs, and impersonation threats.

Moves beyond email
Flexes and scales across hybrid environments to protect distributed workforces. Integrates through native connections to Trellix's XDR ecosystem.

Automates for productivity
Minimizes false positives to optimize security team efficiency, while ensuring core email and collaboration applications protections are in place.
