Trellix Data & Users Security

Keep track of where data is and how it’s protected with our adaptive solutions.

Intelligent security for sensitive data

Trellix Data & Users Security gives you real-time visibility and security of data, protecting against data leakage through dynamic access adjustment, intelligent threat identification, and automated response.

Protects data everywhere
Provides continuous data security from any device with multi-vector DLP. Plus, deploys and updates data with a zero-trust approach.

Applies intelligence at scale
Applies AI/ML insights to identify anomalous user behavior (UEBA), while also automating and simplifying data access policy orchestration.

Adapts across the enterprise
Combines threat research with intelligent automation to adapt to new risks. Allows you to flexibly address ever-growing data security needs.
