

Veeam Backup & Replication

Expect more from your data protection

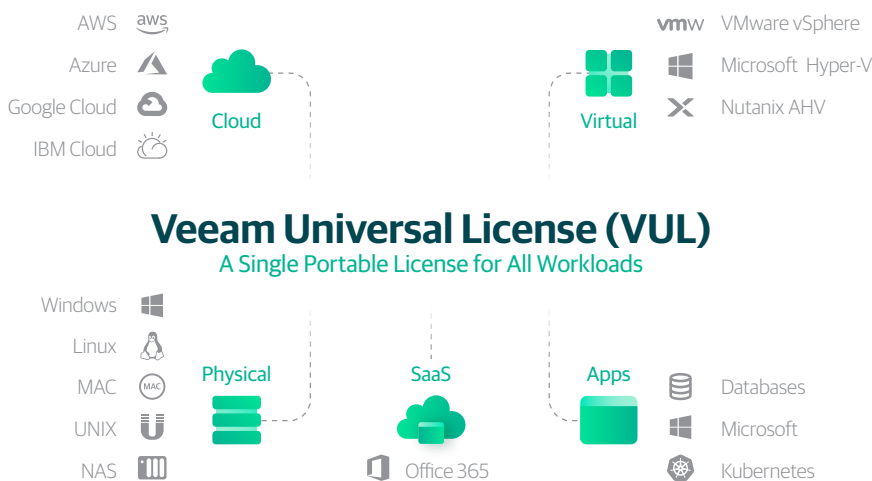

Your data is critical to keeping your business running. Avoiding data loss and keeping costs in check are the main priorities, but balancing these objectives can still be a monumental challenge. With workloads accelerating to multi-cloud ecosystems and workers more often operating remotely, data is harder to manage and control than ever before.

You need a single, robust solution for comprehensive data management that is powerful and flexible enough to protect all phases of your evolving data life cycle and secure enough to stand up against cyberthreats both now and into the future. Is your current backup solution ready for this task?

Veeam Backup & Replication

Veeam® Backup & Replication™ is prepared to address the next generation of operational challenges head-on with a comprehensive set of enterprise-grade data protection capabilities. Powerful, reliable and easy to use, Veeam reduces operational overhead with flexibility that fits your business and market-leading reliability that you can count on.

Veeam Backup & Replication delivers dependable availability across all cloud, virtual and physical workloads with a simple, flexible and reliable solution. Protect your data no matter the location or workload type with powerful backup and instant recovery options.

Protects:

Cloud:

AWS, Microsoft Azure and Google Cloud Platform

Virtual:

VMware vSphere, Microsoft Hyper-V and Nutanix AHV

Physical:

Microsoft Windows, Linux, Mac, IBM AIX and Oracle Solaris and file shares

Applications:

Microsoft, Oracle, SAP and Kubernetes*

*Kubernetes support provided via integration with Kasten K10 backup

Key capabilities

- Backup and recovery:** Ensure your data is backed up and recoverable on your terms with various backup and granular recovery options.
- Automation:** Prepare, test and orchestrate your disaster recovery (DR) strategy to protect critical applications.
- Cloud:** If the cloud is part of your data center strategy, be prepared to backup and recover to, from and within the cloud for portability and cost savings.
- Security:** Effectively manage your backups from virtual testing to ensure that copies of your data are recoverable, secure and compliant.

Powerful, Modern data protection

Veeam® Backup & Replication™ is a 4-in-1 backup and recovery solution for storage snapshots, backups, replicas and continuous data protection in one product. Veeam is the industry leader, ensuring secure and reliable protection for your cloud, virtual and physical workload needs.

With over 150 new features and enhancements, unlocks unprecedented resiliency for any size business.

- Business continuity for critical apps and data with **Veeam CDP**
- Over 20X lower cost, long-term archive-to-cloud storage on **AWS S3 Glacier** and **Azure Archive**
- **Bulletproof ransomware protection** with immutable backups on a hardened Linux repository
- Instant recovery for **NAS, Microsoft SQL** and **Oracle**

Plus, by teaming up with Veeam and our partners, you'll find the services, solutions and expertise you need to get started with:

- Backup as a Service (BaaS) and Disaster Recovery as a Service (DRaaS) providers: Get help managing company data at home offices, in the cloud and beyond.
- Better Together Alliance partners: Expand your tool set with Veeam-ready-integrated solutions.
- Value-Added Resellers and systems integrators: Find the building blocks to architect a winning strategy.

Take advantage of simple, flexible and reliable capabilities, coupled with an ecosystem of experts so you can remain resilient in the face of even the most demanding data protection challenges.

The Veeam Universal License

Veeam enables true license portability for workloads whether they be physical, virtual or in the cloud with Veeam Universal License (VUL). This fully featured license allows customers to license all workloads with one type of license.

Expanding ecosystem

Veeam is software-defined and hardware-agnostic. It partners with a broad ecosystem of dedicated partners to help customers achieve their goals without having to implement proprietary solutions. Veeam enables customers to choose their infrastructure and storage, allowing them to make the best ROI on existing and future infrastructure purchases. Additionally, Veeam continues to expand its APIs for rich third-party integrations, including data mining, data re-use and other advanced features.

Value-added solutions:

Combine backup, monitoring and automation together and save!

Veeam Availability Suite:

Couples the benefits of Veeam Backup & Replication with the monitoring and analytics of Veeam ONE.

Veeam DR Pack:

Add the Veeam® Disaster Recovery Orchestrator, to ensure business continuity for all your VMs.

Rental licensing for Service Providers:

Offered through a pay-as-you-grow program to Veeam service provider partners, Rental licensing unlocks à la carte options to deliver services to customers with Veeam Backup & Replication™ Veeam Cloud Connect and more.

Simple, flexible and reliable!

The global leader in data protection!

- 400,000 customers and growing
- Veeam protects over 83% of Fortune 500 companies
- +75 NPS Score: Over 3.5x industry average
- Over 24,000 service providers Veeam. It just works!
