

Special Offer!

Simple, seamless backup and recovery with cloud storage to reduce costs and downtime while increasing efficiency.

Limited Time Offer: Receive complete data protection at a cost 20% lower than competitive renewals when adding Wasabi cloud storage.

Backup Exec & Wasabi Technologies

Simplify cloud and data management

The combination of Wasabi and Veritas provides customers of all types and sizes a trusted, comprehensive, cost-effective and secure data protection solution. Protect all your data, including your Microsoft 365 data, with immutable object locked backups.

- Unified solution for virtual, physical, public and hybrid cloud environment.
- Direct backup to cloud.
- Scalable cloud storage that grows with your needs.
- Maintain an efficient archive with global deduplication tools.

Backup Exec and Wasabi provide a trusted data protection, recovery with an additional layer of protection with Object Lock.

Key Benefits:

- Lower TCO for complete data management and storage solutions.
- Predictable budgeting / forecasting with less add-ons.
- Ransomware mitigation / protection via immutability (object lock).

Key Features of Backup Exec and Wasabi

- Fully integrated support for the protection and recovery of Microsoft 365 workloads.
- Ransomware resiliency including anomaly detection and malware scanning.
- Seamless integration with Wasabi cloud storage to provide immutable backups.
- Dramatic backup, recovery and storage price and performance improvement.
- Instant recovery and recovery ready of VMware and Hyper-V virtual machines.
- Improved performance of incremental forever backups of VMware and Hyper-V workloads compared to traditional backup methods.
- Integrated bare-metal Disaster Recovery, physical to virtual (P2V), and virtual to physical (V2P) recovery help minimize downtime and disruption.
- Deduplication everywhere allows you to protect more data while minimizing space.
- Superior security for your data through integrated 128-/256-bit AES industrial-strength encryption and compliance with Payment Card Industry Data Security Standard (PCI DSS) 3.1/3.2 and Federal Information Processing Standards (FIPS) MSDP-C.
- Unified data protection solution for virtual, physical, public and hybrid cloud environments.

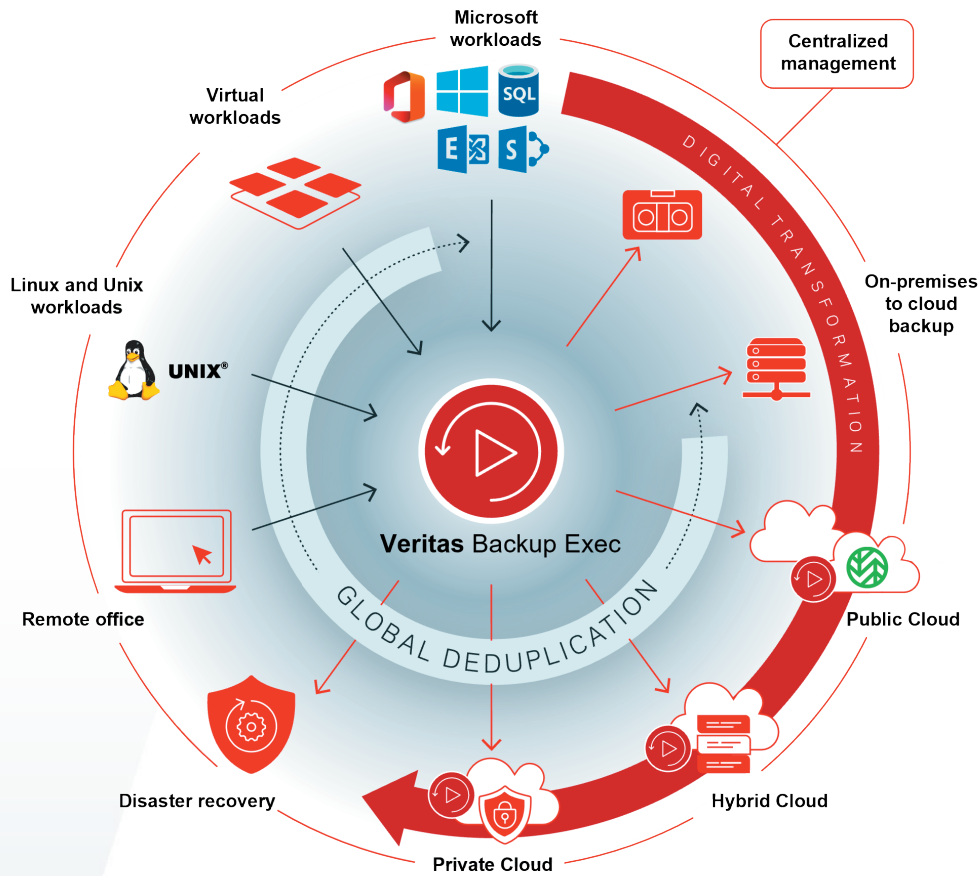

Figure 1. Backup Exec offers the true, unified, cost-effective data protection required for backups across cloud, virtual and physical deployments via a single console.

About Veritas

Veritas Technologies is the leader in secure multi-cloud data management. Over 80,000 customers—including 91% of the Fortune 100—rely on Veritas to help ensure the protection, recoverability and compliance of their data. Veritas has a reputation for reliability at scale, which delivers the resilience its customers need against the disruptions threatened by cyberattacks, like ransomware. No other vendor is able to match the ability of Veritas to execute, with support for 800+ data sources, 100+ operating systems and 1,400+ storage targets through a single, unified approach. Powered by Cloud Scale Technology, Veritas is delivering today on its strategy for Autonomous Data Management that reduces operational overhead while delivering greater value.
