

# WE GET

---

## VMWARE SERVICES

Technology for businesses is complex. Legacy infrastructure, multiple vendors, disparate technologies and different platforms aren't making it any easier. But IT departments are still expected to provide a seamless technology experience for users. CDW can help. We have the partners and services to help make it all work together. We call that IT Orchestration.

### CDW Services at a Glance:

#### EXPERTISE PLUS EXPERIENCE

Our deep expertise across a full range of integrated technology solutions backed by deep industry specialization allows us to provide flexible, end-to-end services to our customers. Our on-demand resources provide the assistance and scale your IT team needs – freeing them up to focus on delivering bottom-line value and innovation.

#### HOW WE DO IT

We get that every IT solution is unique, and that its delivery must be customized to meet your specific needs. In tandem with industry-leading partners, our highly experienced architects, engineers and project managers will work with you to assess, design, implement and manage solutions that meet your needs and help you reach your IT goals.

#### OUR SERVICES

From configuration and maintenance to advanced engagements across cloud, mobility, security, data center and collaboration, CDW has the expertise you need to help with everything. Our technical support and professional services experts, architects and engineers give your IT team the time and focus they need to turn IT into a competitive advantage.

#### OUR VALUE

We know IT. That's our business. When you partner with us, we take the extra load off of your IT team so they can focus on innovating while your organization maximizes its IT investments – all while delivering real value for your customers.
