

WE GET FREEING APPS TO WORK ACROSS ANY CLOUD.

CDW Amplified™ Data Center
Enabled Deployment Service
for VMware Tanzu Standard
or Tanzu for Kubernetes Operations (TKO)

The imperative to accelerate software delivery at scale continues to determine winners and losers inside every industry. Organizations focused on transforming how they build, deliver and run applications across their choice of private and public clouds increasingly seek partners and tools who help them ship better software, faster, free up development teams to innovate, and who help simplify operations across clouds using cloud-native patterns and to simplify and streamline operations.

Microservices, containers and Kubernetes help free apps from infrastructure, enabling them to work independently and run anywhere. With VMware Tanzu, any enterprise can make the most of these cloud-native patterns, automate the security and delivery of containerized workloads, and proactively manage apps in production so that Dev and Ops are transformed, together.

With our VMware Master Services Competency in Cloud Native, which covers VMware Tanzu, CDW's Digital Velocity (DV) team provides a range of services to strategize, plan and implement VMware Tanzu. For organizations seeking a smoothly paved road to cloud-native patterns in order to accelerate the benefits of applications freed to work across any cloud, VMware's Tanzu is a leading choice. In our Enabled Deployment Service for VMware Tanzu Standard or TKO, we integrate deeply with your team to install, migrate and adopt VMware Tanzu and propel your organization towards modern, cloud-native patterns and practices that move Dev and Ops forward together.

Enabled Deployment Service for VMware Tanzu Standard or TKO can help you achieve:

 **Operational Efficiencies**
 **Agility**
 **Faster Innovation**

Orchestrating the Right Solution

CDW's Enabled Deployment Service for VMware Tanzu Standard or TKO is a collaborative journey through deployment and migration, and includes a strategic Executive Readout upon conclusion. As a digital systems integrator, through our engagement, we will:

- Design, build and configure VMware Tanzu Standard or TKO
- Co-develop a migration plan for one containerized application
- Team with you to get a workload into production
- Provide an understanding of future capabilities and a roadmap to broadly modernize applications
- Connect you with capabilities such as service mesh, observability and additional cloud components
- Provide options for additional training on topics such as in-depth Kubernetes, advanced public cloud integration and more

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

CDW GETS VMWARE

CDW engineers have been deploying VMware platforms and solutions since 2006. Today, with more than 250 engineers with expertise focused on software-defined infrastructure, hybrid and multi-cloud architectures, cloud-native software development, and DataOps and AI/ML, CDW is one of the most technically capable solutions integrators in the industry. CDW and VMware likewise have teamed up to bring our leading capabilities together to deliver truly compelling and differentiated solutions.

Our partnership delivers:

- Leading compute, storage and network virtualization capabilities
- Support for a broad range of workloads and capabilities
- A broad set of cloud services
- Global scale and reach

SERVICES**

Services Overview

The following elements are included with the Enabled Deployment Service for VMware Tanzu Standard or TKO:

Service	Included in Tanzu Standard package	Included in Tanzu TKO package
Learn about and leverage cloud-native patterns	✓	✓
Design, build and configure VMware Tanzu Kubernetes Clusters	✓	✓
Deploy and migrate to a containerized platform	✓	✓
Receive guidance on VMware Tanzu adoption	✓	✓
Proactively manage application(s) in lab/production	✓	✓
Mentored, collaborative engagement on VMware Tanzu	✓	✓
Design, build and configure VMware Tanzu Cluster Management GUI		✓
Design, build and configure VMware Tanzu Observability for Workloads		✓
Design, build and configure VMware Tanzu Service Mesh		✓

Services Timeline

The following table displays the roadmap for a typical Enabled Deployment Service for VMware Tanzu Standard or TKO engagement:

Service Phase	Tanzu Standard	Tanzu TKO
Project kickoff and pre-install tasks	Week 1	Week 1
Install and configure VMware Tanzu and associated services	Weeks 2-3	Weeks 2-4
Migration of containerized application	Weeks 4-5	Weeks 5-6
Executive readout	Week 6	Week 7

CDW Drives Digital Velocity

CDW's Digital Velocity (DV) team members are elite technical advisors who team deeply with executive technologists to drive customer connection and time-to-value (TTV) velocity. Widely recognized for cutting-edge excellence as a top technical SI, our advanced DevOps and automation capabilities are tested across hundreds of Fortune 5000 organizations who have worked with our industry-seasoned, business-savvy engineers to deliver increased profitability, risk mitigation, resonant customer experiences and more business outcomes that meaningfully shift our customers' results.
