

# Get on the Fast Track to More Efficient and Cost-Effective Government and Healthcare Workflows.

Next-generation Zebra mobile computing, barcoding, RFID, and printing technologies help you automate, optimize, and streamline your government and healthcare inventory, asset management and workflows for superior efficiency and cost savings.

## Inventory Management

- Label, tag and digitally track and locate your inventory with barcoding and RFID.
- Gain real-time, accurate and end-to-end visibility into supply chain needs and usage.

## Asset Management

- Always know the status and location of your valuable and mission-critical assets.
- Digitize your workflows for more proactive maintenance, inspection and compliance.

## Digital Mobile Workflows

- Create paperless and efficient government, patient, lab and pharmacy workflows.
- Enable easy access to records, automated data capture, and digital workflows anywhere.

## Real-Time Team Collaboration

- Connect in real-time with all-in-one text, voice, video and PBX phone communication.
- Collaborate more efficiently and effectively with easier mobile connectivity.

## Identity Management

- Identify and verify personnel and patients with RFID and barcoded IDs and wristbands.
- Control access and maximize safety with tamper-resistant and encrypted IDs.

## Public Safety and Code Enforcement

- Create digital, paperless workflows for more efficient enforcement and compliance.
- Auto-capture data, document violations or non-compliance and issue citations.

## Fleet and Vehicle Maintenance

- Track maintenance, inspection, repairs and compliance with paperless mobile efficiency.
- Easily manage your fleet and vehicles for better safety and compliance at less cost.

## The Three Keys to Superior Government and Healthcare Efficiency

- 1 Automated Data Capture, Tracking and Locating
- 2 Fast, Efficient and Accurate Digital Workflows
- 3 Real-Time Data, Insights and Intelligence
