

CDW 2017 DIGITAL WORKSPACE SOLUTIONS REPORT

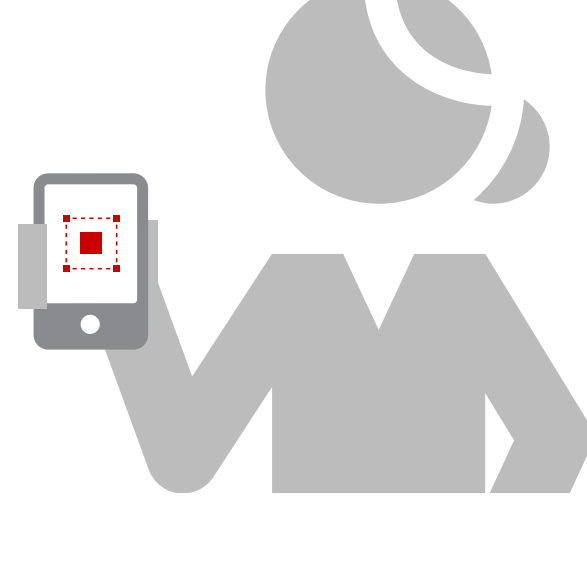

Digital Workspace Solutions: Current State of the Industry

Organizations have experienced a shift in mobile and collaboration solutions

of IT and non-IT executives **say their organization** sees mobile and collaborative strategies as a single entity

CDW also refers to these as **digital workspace solutions**.

say they **feel more productive** due to the advancement of digital workspace solutions

feel they are able to **work on tasks more easily**

New Decision Makers

of digital workspace solutions are now **selected by departments** other than IT

of organizations say non-IT executives are more often the **final decision makers** on digital workspace purchases

say they are more often **consulted by IT** during the evaluation and purchasing process

These organizations are nearly twice as likely to offer an **“exceptional”** digital workspace experience

Exceptional Experiences

Organizations providing **exceptional digital workspace experiences** are significantly more likely to offer an array of mobility, productivity and collaboration-enhancing solutions, most notably:

Exceptional

Non-exceptional

Room for Improvement

However, just

rate their organization's current digital workspace experience as exceptional

In addition to the usual budget and security concerns, top challenges include:

Training end users

Integrating with existing IT

Finding one solution that fits everyone

The Outlook

In the next 5 years, organizations want the following digital workspace solutions:
