- Brightness 3,500nits
- Slim Bezel Design
- Long-lasting (Up to 100,000 hours)
- Quick Lock & Flip Design
- Front or Rear Serviceability
- High performance system controller
- Compatibility with LG Software Solutions

The dynamics of retailing are forever evolving. Savvy retailers recognize the need to deliver a unique and memorable experience that isn't available online. One that keeps consumers coming back. DVLED displays can create an exciting and immersive in-store experience. They can be deployed to enhance and blend seamlessly into existing architecture to create a pleasing ambiance or serve as a key focal point that delivers brand and promotional messaging and highlight the latest product trends.

LG recognizes the need for differentiation at retail, and that's why we offer more than a dozen fully kitted DVLED display solutions with all parts ready to assemble, shipped in LG-branded, wheeled flight cases, accompanied with premium features and services.

LSBB Fine-Pitch Essential Series

The LSBB Fine-Pitch Essential Series can be used to add excitement and highlight special promotions. It has a wealth of features, including easy-handling lightweight cabinets, front serviceability, a signal detection status indicator, and compatibility with LG software solutions.

- Pixel Pitch Options: 0.9mm, 1.2mm, 1.5mm, 1.8mm
- Brightness: 600 nits
- Signal Detection Status Indicator
- Front Serviceability
- Easy-handling Lightweight Cabinet
- Compatibility with LG Software Solutions

LSBC Series Compact Indoor LED Digital Signage

Retailers looking to impress customers will appreciate how the LSBC series can deliver content in rich, vivid colors thanks to HDR (HDR10, HDR10 Pro*) support. These compact DVLED cabinets can be installed around corners using an optional 90° corner configuration**, adding dramatic impact to existing environments. An ingenious quick-lock system makes installation a breeze and helps maintain outstanding alignment. For added convenience, the cabinets can be accessed from the front or rear. Highlight promotions, brands, products, and key events on an immersive LSBC series display.

- Pixel Pitch Options: 1.9mm, 2.9mm, 2.9mm, 3.9mm
- Brightness: 1000nits
- Compact Cabinet Design
- 160° Horizontal and 140° Vertical Viewing Angles
- Quick Lock & Flip Design for Easy Install
- Front or Rear Access

* HDR10 Pro is LG's HDR solution to process HDR signals by using enhanced dynamic tone mapping.

** Corner option is available as an add-on at no additional cost and should be identified on the initial ordering form.
