

5D[®] Security Assessment

Address security gaps in your organization and protect your sensitive data.

Internet of Things (IoT) and Operational Technology (OT) security is increasingly critical to business operations. Most organizations have adopted robust security programs to address standard IT system vulnerabilities, however, few have expanded their security operations to include their IoT/OT assets.

To address IoT/OT threats, CDW has developed 5D[®], a proprietary methodology based on years of experience addressing a vast array of IoT/OT challenges. Whether your organization is industrial, healthcare, or commercial, CDW's **5D[®] Security Assessment** will address your organization's IoT/OT security risk and position you to handle malicious attackers for years to come.

The Five Ds

The CDW 5D[®] Security Assessment begins and ends with your business. Working collaboratively, CDW takes your organization through our five steps to address IoT/OT security gaps.

1) Detection

- Business Requirements
- Asset Detection
- Data Monitoring
- Event Detection
- Asset Inventory
- Identity & Authentication Control

2) Definition

- Organizational Roles & Responsibilities
- Policies
- Alert Thresholds
- Risk Mitigation Plan
- Change Management Process
- Prioritization of Assets
- Financial Impact Analysis

3) Decision

- Asset Lifecycle
- IoT/OT Segmentation Plan
- Tool Selection

4) Deployment

- Segmentation
- Tool Deployment
- Asset Deployment
- Policy Configuration & Enforcement
- Analysis & Refinement

5) Defense

- Adversity Operations Plan
- Incident Recovery Plan
- Rapid Response Roundtable
- Quarterly Executive Review

Build faster, be stronger with CDW Digital Velocity

Digital Velocity is the most technical solutions integrator in the industry. With hundreds of expert engineers and a full stack software development practice, Digital Velocity is your technical services partner when results and velocity matter.

We prioritize building solid partnerships with our customers, listening to their needs, and delivering exceptional value and service.
