

# WE GET DETECTING AND PRIORITIZING THREATS IS A TOP PRIORITY.

CDW Amplified™ Detect and Respond  
CDW Managed SIEM

Security Incident and Event Management (SIEM) is a critical tool for neutralizing or preventing cyberattacks and is extremely helpful for demonstrating compliance. It is also costly, tedious to deploy, and time-consuming to operate and manage. CDW Managed SIEM is an affordable cloud-based SIEM as a Service solution that minimizes these challenges, allowing you to realize the benefits of a SIEM while remaining fully focused on the strategic needs of your business.

CDW Managed SIEM can help you achieve:

Operational  
Efficiencies

Reliability

Reduced  
Risk

## Orchestrating the Right Solution

As an extension of your IT department, CDW provides trained experts and a cloud-based SIEM as a Service solution to deliver real-time incident response, log collection and correlation, and reporting. In addition to helping you keep up with your logging compliance requirements, our experts notify you immediately of an attack and quickly act to block further attacks.

When you choose to partner with CDW for your managed SIEM as a Service, your organization will experience the following game-changing benefits:

- **Simplified Deployment and Implementation:** Provide CDW with a few details during onboarding and we will do the rest.
- **True 24/7 Management:** Free your IT Team from the responsibility of proactively monitoring, managing, configuring and updating/patching your SIEM around the clock. Our solution covers normal business hours, after hours, weekends, holidays, vacation and sick days. CDW Managed Services are never "off the clock."
- **Faster Response Times:** Trust our mature, 60-person strong Security Operations Center (SOC) to sift through logs, and detect and escalate threats.
- **Reduced OPEX:** Lower your costs of hiring, training, accrediting and retaining appropriately skilled in-house engineers/SIEM analysts.
- **Reduced CAPEX:** Transition most costs from a capital expenditure model to a more predictable operational expense framework. The cost of the SIEM technology (including periodic replacement) is included in your fixed monthly cost, which is guaranteed for the life of your contract.

## CDW GETS INFORMATION SECURITY

CDW Managed SIEM is delivered using industry-leading cloud-based SIEM technologies. The SOC has provided cybersecurity solutions since 2007 and is now 60 analysts strong.

CDW's full lifecycle of Services can support your business no matter where you are on your journey
