An example of the HPE Circular Economy Report

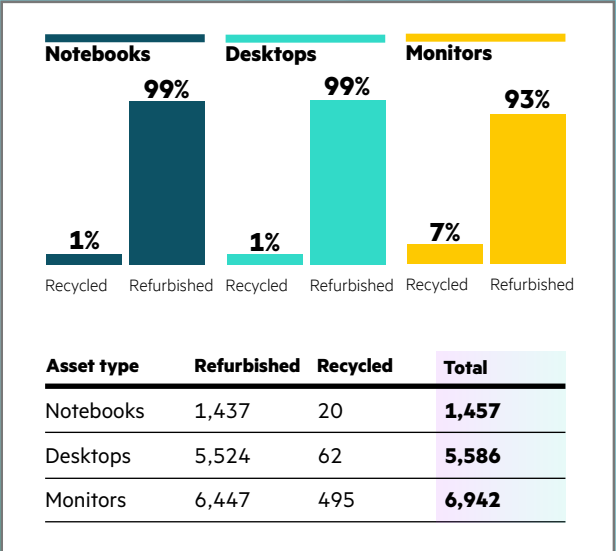

Promotional program

HPE Circular Economy Report is available to customers who have returned their end-of-use equipment to HPEFS. The report measures the impact of your IT lifecycle management choices.

Avoided environmental impact

Refurbishing and recycling IT products with HPEFS can enhance your productivity, capture new value from returned assets, and reduce environmental impact.

The avoided environmental impact is part of the HPE Circular Economy Report as shown in the example:

90,869kg
CO2e saved

This equals approximately **2,257.51** people flying from JFK to LAX

124,546kWh
energy saved

This equals the average summer electricity consumption of approximately **89.3** US citizens

26,600.68kg
waste kept from landfills

This equals the average waste generated by approximately **32.71** US citizens for a year

HPEFS prioritizes Sustainability

9.5M

assets **put back in use** over the last 3 years³

\$1B

infused back into customer budget **over the last 3 years**

86%

reuse for servers assets in FY24

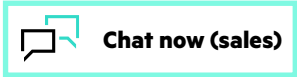

94%

reuse for PCs⁴
