

Your Roadmap to Mature, 24x7 Security Operations

Modern security operations are harder than ever to manage alone. Cyber threats continue to grow in volume and sophistication while security teams face increasing pressure to do more with limited resources. Organizations need greater visibility, faster response and continuous protection across their environments.

The Challenge: Security Complexity Is Accelerating

More threats. More tools. Less time.

Visibility Gaps

Blind spots delay detection.

Tool Sprawl

Siloed tools slow action.

Alert Overload

Noise buries real threats.

Resource Pressure

24x7x365 coverage is hard to sustain.

The Five-Pillar MDR Journey:

Taking You From Security Signals To Business Outcomes

1

DETECTION
Close blind spots across endpoints, identity, cloud, email and network.

BUSINESS OUTCOME
Reduced Risk
Detect threats faster, contain incidents sooner and limit business impact.

2

CORRELATION
Unify security data to reveal the full scope of an attack.

BUSINESS OUTCOME
Business Resilience
Minimize disruption and keep critical operations moving.

5

OPERATIONS
Maintain 24x7 coverage while advancing security maturity over time.

BUSINESS OUTCOME
Continuous Maturity
Improve defenses as your business, technology and threats evolve.

CDW Managed Detection and Response

Part of CDW Managed Security Services: one strategic partnership bringing together advisory, protection, response and governance to reduce risk and help your organization continuously improve.

3

INVESTIGATION
Prioritize validated threats so teams can focus on what matters.

BUSINESS OUTCOME
Compliance Confidence
Support audits, regulatory needs and governance expectations.

4

RESPONSE
Act quickly with analyst-led response that limits business impact.

BUSINESS OUTCOME
Operational Efficiency
Add expert SOC capacity without adding SOC complexity.

How CDW Helps

CDW Managed Security Services helps organizations move beyond alert management to build a mature, outcome-driven security operations program that continuously reduces cyber risk.

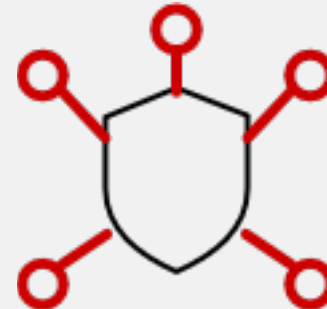

Expert Security Operations

Dedicated analysts and responders provide around-the-clock threat monitoring and incident support.

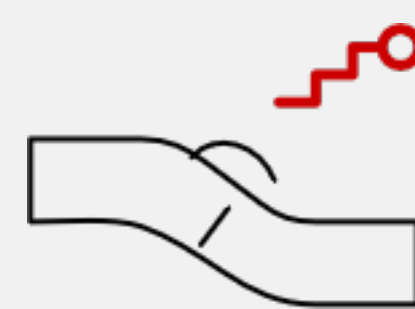

Proven Operational Excellence

Proven processes, governance, and documented playbooks drive consistent security outcomes.

Integrated Security Ecosystem

We work with the tools you already own. Integration across dozens of leading security technologies means stronger defenses without costly replacements.

Strategic Security Partnership

Strategic guidance and expanding security capabilities help strengthen resilience over time.
