

Securely deploy and configure firewalls with expert-led training from CDW.

Firewall Deployment and Configuration Training

Misconfiguration is the leading cause of firewall failures, which can jeopardize secure access, expose users and applications to threats, and result in significant data loss. Many organizations struggle to find skilled talent capable of securely deploying, configuring and managing firewalls. This gap not only increases security risks but also limits operational efficiency and compliance.

CDW offers comprehensive training that equips security engineers with the essential knowledge and skills to effectively deploy and configure firewalls. Through expert-led instruction, participants will learn to identify and resolve performance issues, ensuring their firewalls provide necessary protection and adapt to evolving security requirements.

Firewall Deployment and Configuration Training can help you achieve:

Operational Efficiencies

Increased Performance

Reduced Risk

Finding the Right Solution

CDW provides courses in firewall deployment, configuration, maintenance and troubleshooting for leading firewall vendors, including Palo Alto Networks, Fortinet and Cisco. Our trainings use vendor-accredited courseware, qualified instructors and immersive and interactive digital labs. With introductory to advanced courses on the top firewall technologies, CDW offers you and your team everything needed to deploy, configure and manage your firewall solutions.

- **Interactive Instruction:** Most courses seamlessly blend instructor-led training with interactive lab activities, ensuring your new knowledge turns into new skills.
- **Latest Insights:** Course materials are always up-to-date, ensuring your training is current with the latest product and software releases.
- **Instructors:** Each course is led by a certified instructor, vetted by both the vendor and CDW, which has demonstrated excellence in delivery, technical skills and classroom management.
- **Training Credits:** As a partner to leading firewall vendors, CDW accepts vendor training credits for many of our firewall courses.
- **Flexible Delivery:** CDW offers most training in virtual and classroom settings, with open enrollment for individuals and small groups or private sessions for teams and large groups.

CDW + FIREWALL LEADERS

CDW has longstanding, award-winning partnerships with major firewall vendors.

Palo Alto Networks

- Authorized Training Partner of the Year for the Americas
- Americas Partner of the Year
- Global Partner of the Year
- Diamond Innovator Partner
- State, Local and Education Government Partner of the Year
- Federal Partner of the Year

Fortinet

- Partner of the Year
- Largest Fortinet partner with the highest pricing discount level
- Highest partner certification with Fortinet
- Authorized Training Partner

Cisco

- Partner of the Year
- Data Center Partner of the Year
- SMB Partner of the Year
- Fed. Intelligence Partner of the Year
- Commercial Partner of the Year
- Gold-Level Partner and Integrator

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

Services Overview

CDW offers many courses on leading firewall platforms, including the sample listed below:

Course Name	Length	Cost
Palo Alto Networks		
Firewall Essentials: Configuration and Management <ul style="list-style-type: none"> Enhance your understanding of how to configure and manage Palo Alto Networks Next-Generation Firewalls. 	5 days	\$5,000
Panorama: Managing Firewalls at Scale <ul style="list-style-type: none"> Gain in-depth knowledge about how to configure and manage a Palo Alto Networks Panorama management server. 	2 days	\$2,000
Firewall: Troubleshooting <ul style="list-style-type: none"> Learn to troubleshoot the full line of Palo Alto Networks Next-Generation Firewalls. 	3 days	\$3,000
Prisma Access SASE Security: Design and Operation <ul style="list-style-type: none"> Better protect your applications, remote networks and mobile users using a SASE implementation. 	4 days	\$4,000
Prisma SD-WAN: Design and Operation <ul style="list-style-type: none"> Learn to configure, operate and troubleshoot the next-generation Prisma SD-WAN solution. 	5 days	\$5,000
Fortinet		
FortiGate Administrator <ul style="list-style-type: none"> Learn how to protect your networks using the most common FortiGate features. 	4 days	\$3,800
FortiGate Immersion <ul style="list-style-type: none"> This is a lab-only course, where you are assigned a series of do-it-yourself (DIY) configuration tasks in a virtual lab environment. 	1 day	\$950
FortiGate Bootcamp <ul style="list-style-type: none"> This is a combination of the FortiGate Administrator course and the FortiGate Immersion course. 	5 days	\$4,750
FortiManager <ul style="list-style-type: none"> Learn how to use FortiManager for the centralized network administration of many FortiGate devices. 	2 days	\$1,900
FortiAnalyzer Administrator <ul style="list-style-type: none"> Learn how to deploy, configure and secure FortiAnalyzer, as well as how to register and analyze devices. 	1 day	\$950
Cisco		
SFWIPF — Fundamentals of Cisco Firewall Threat Defense and Intrusion Prevention <ul style="list-style-type: none"> Implement and configure Cisco Secure Firewall Threat Defense for deployment as a next-generation firewall at the internet edge. 	5 days	\$4,000
SCOR — Implementing and Operating Cisco Security Core Technologies <ul style="list-style-type: none"> Master the skills and technologies needed to implement core Cisco security solutions to provide advanced threat protection against cybersecurity attacks. 	5 days	\$4,000
SDWFND — Cisco SD-WAN Operation and Deployment <ul style="list-style-type: none"> Deploy, manage and operate a secure, programmable and scalable SD-WAN fabric using IOS XE Cisco SD-WAN products. 	2 days	\$2,200
SFWIPA — Advanced Techniques for Cisco Firewall Threat Defense and Intrusion Prevention <ul style="list-style-type: none"> Deploy and configure Cisco Secure Firewall Threat Defense system and its features as a data center network firewall or as an Internet Edge firewall with VPN support. 	5 days	\$4,000
SSFRules — Securing Cisco Networks with Snort Rule Writing Best Practices <ul style="list-style-type: none"> Learn to write rules for Snort, an open-source intrusion detection and prevention system. 	3 days	\$3,000
