

Enhance your security with Data Protection Solutions from CDW.

Due to increased accessibility from cloud and AI services, organizations are at greater risk of a data breach today than ever before. Data protection solutions from CDW can help mitigate these risks with increased visibility and layered controls through the information lifecycle.

Data Protection solutions can help you achieve:

Compliance

Data Risk Reduction

Scalability

Protect Your Most Valuable Asset

Let CDW Security experts work with you to define a more successful data protection strategy focused on:

- **Compliance.** A mature data protection program simplifies compliance by enabling visibility of the access, flow, retention and disposal of information across all levels of classification through the information lifecycle.
- **Risk Reduction.** Mature program capabilities, controls, and processes enable the reduction of risks associated with a data breach, like the loss of regulated or sensitive data, brand reputation, and shareholder trust.
- **Scalability.** Data Protection services can inform and be integrated into larger initiatives such as cloud security, Identity Access Management, and zero trust, providing scalable services and solutions.

Data Protection Solutions Tailored to Your Business Needs

Our environment-agnostic approach to data protection services is easily deployable across traditional on-premises, hybrid or cloud-based enterprise networks, ensuring a flexible delivery approach tailored to the unique characteristics of your environment.

Business Priority	Solution
Data Protection Workshop	Learn more about best practices in data protection and get high-level observations about your current program
Data Protection Assessment	CDW experts will review your current program to identify gaps, provide recommendations, and define go-forward maturity initiatives.
Data Protection Program Development	CDW Security experts will provide support to remediate program governance through strategy, policies, procedures, standards, diagrams, implementation designs and plans.
Data Discovery	Define your data landscape with targeted or enterprise-wide data discovery.
Technical Advisory	Let CDW experts support the tuning of existing data protection solutions or the installation of new ones.
