Digital Velocity Factory Assessment

Improve your team or organization's capacity to deliver.

Your teams deserve more than just speed, they need the freedom to innovate without friction. CDW's Digital Velocity Factory Assessment uncovers what's slowing you down across your software development lifecycle. From outdated workflows to hidden bottlenecks, we help you identify and remove the barriers holding your business back.

Our experts deliver a clear path forward, mapping your current state, highlighting the most valuable areas for improvement and recommending future-ready solutions. You'll walk away with an actionable roadmap to reduce time-to-market, elevate quality and unlock real agility across your tech stack.

The result? Faster ideas to impact. Smarter software delivery. And a foundation built for sustainable growth.

Objectives of the Digital Velocity Factory Assessment

- More efficient flow of work
- Increased automation and use of AI
- Reduced handoffs and delay between technical teams and resources
- Improved collaboration between resources and teams
- Increase the rate of delivery/time to market, while reducing risk

Break free from application complexity and unlock what's next for your business. Our experts help simplify your app landscape so you can focus on innovation, not limitations.
