WE GET CHOOSING
THE RIGHT SOLUTION
IS A CRUCIAL FIRST STEP.

CDW Amplified™ Networks
SD-WAN Advisory Workshop

Your enterprise is contemplating the benefits of Software Defined (SD)-WAN to ensure an outstanding user experience by reducing costs and increasing the quality of transmission required to support your applications. You are thinking of taking the next step of implementing a solution, but there are many vendors that make up the enterprise SD-WAN market, and implementing a solution requires deep technological knowledge in networking, cloud and security. This can become a nightmare for you to evaluate the best solution that will provide the desired business outcomes.

CDW's SD-WAN Advisory Workshop leverages CDW's engineering training and field knowledge within multiple disciplines, as well as our training and field knowledge for each of the major vendors. We provide summary recommendations based on your business requirements discussed in the discovery phase of the service.

An SD-WAN Advisory Workshop can help you achieve:

Reduced Risk

Increased Performance

Faster Innovation

Orchestrating the Right Solution

CDW's SD-WAN Advisory Workshop consists of the following steps:

1. The Advisory Workshop focuses on presenting SD-WAN business and technical benefits, tenets of SD-WAN, an overview of the manufacturer landscape, a deep dive on up to three selected vendors, and a review of general deployment considerations.

2. After the presentation, CDW will have an interview session to help determine what SD-WAN solution is correct for your organization's business and technical needs.

3. Based on the interview, you will choose the SD-WAN vendor that best meets the needs of your organization. The vendors that you can choose from for the deep dive portion of the workshop are the following[1]:

Cisco Viptela | Cisco Meraki | SilverPeak | VMware (VeloCloud) | Aruba SD-Branch

CDW's full lifecycle of Services can support your business no matter where you are on your journey

Design → Orchestrate → Manage

On-Premises → On-Journey → Cloud-Based

CDW GETS NETWORKING

CDW has demonstrated success providing networking, security and SD-WAN services for multiple vendor solutions. Our field engineers possess a wide breadth of experience in designing, orchestrating and managing SD-WAN environments.

Services Checklist

Below is the supported ordering option for SD-WAN Advisory Workshop:

Service	Statement of Work (SOW)
SD-WAN Advisory Workshop	✓

Contact your account team to learn how CDW can optimize your SD-WAN investment.

[1]Note: Since CDW does not currently provide services for Aruba SD-Branch and VMWare (VeloCloud), the level of detail provided may be limited.
