

PCI COMPLIANCE SERVICES

Secure and protect
cardholder data

OVERVIEW

As a merchant or service provider, you are responsible for ensuring that you achieve and maintain compliance with the Payment Card Industry (PCI) Data Security Standard (DSS), which defines requirements for the protection of consumers' payment card information while stored, in transit, or during processing.

Organizations that fail to comply with the PCI DSS can face significant fines, loss of customer goodwill, and may lose the ability to accept credit cards for payment.

CDW assists clients in meeting and maintaining their PCI compliance requirements by providing sustainable solutions that may be integrated with other compliance requirements to reduce the cost of compliance as a whole.

CDW is a certified QSA organization, and every member of our PCI team holds the QSA designation. We have delivered thousands of successful engagements to all levels of merchants and service providers across a broad range of industries in the public, private, and non-profit sectors.

OUR PCI PRACTICE

EXPERIENCED CDW has been a certified PCI QSA for more than 17+ years.

BROAD EXPERTISE Experience across multiple technologies, platforms, and disciplines.

TRUSTED CDW is the trusted PCI QSA for dozens of Fortune 500 companies.

COMPLETE SOLUTIONS CDW offers advisory, assessment and technical testing to fully support your PCI Compliance program.

ABOUT US

CDW offers a unique approach to risk management, one that delivers a unified strategy to address data risk through a unique combination of service offerings. CDW has brought together industry-leading expertise in cybersecurity, identity and access management, data privacy and analytics, internal auditing and hands-on training services. By integrating these services, we provide our clients with the flexible support they need to protect and leverage data across any part of their organization.

CERTIFICATIONS

CISSP, OSCP, OSWE, CIPP, CISA,
SWIFT CSP and PCI-QSA

OUR SERVICES »

ANNUAL ONSITE AUDIT

Our team compares each requirement of the PCI DSS with your current practices to determine your compliance, and can issue a ROC and an AOC, if compliance has been achieved.

PCI DSS READINESS ASSESSMENT AND COMPLIANCE ROADMAP

Our team walks through the PCI DSS 4.0 with your organization and identifies any gaps in compliance and opportunities for improvement. Following our evaluation, we provide an executive report that contains definitive scoping information, scope reduction strategies customized to your environment, compliance gaps ranked by risk level, and a comprehensive compliance roadmap with actionable recommendations.

SELF-ASSESSMENT QUESTIONNAIRE ASSISTANCE

Once you feel confident that your organization is compliant, our team will walk through the self-assessment questionnaire with you and help you develop the best response and determine if there are any weak points in compliance.

PCI ADVISORY AND QSA RETAINER SERVICES

Whatever PCI challenge your organization is facing, our team can be your go-to subject matter expert. When questions arise about PCI 4.0, scoping, targeted risk analyses, SAQ options or other PCI DSS decisions, CDW experts can provide definitive answers by leveraging on our 15+ years of experience working with customers on similar issues.

PENETRATION TESTING

CDW's external, internal, segmentation validation, web application, mobile application, and wireless penetration testing services help you uncover hidden vulnerabilities and prioritize security issues, allowing you to make informed decisions to minimize risk and reduce your attack surface.

PCI CLOUD ASSESSMENT

Our custom PCI cloud methodology allows our QSAs to apply PCI security controls to cutting edge cloud operations, including software-defined networking, multitenancy, and third party management, as well as management plane, API, automation script, and container security.

ONGOING SUPPORT

Our team provides ongoing support to ensure that new policies, procedures, and applications meet compliance requirements, and also advise on any ongoing security initiatives that may affect compliance each year.
