

COMMUNITY-EMPOWERING CONNECTIVITY

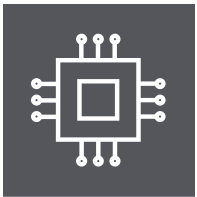

ORCHESTRATED BY CDW

Technology provides the foundation for smart city roadmaps, which aim to transform the quality of daily life for the people who live, work and play in the community. By capitalizing on IoT-connected devices and sensors, advanced analytics, citizen-centric applications, geolocation services and more, smart cities can optimize resources, strengthen accountability and responsiveness, improve efficiency, reduce costs, and engage and empower citizens.

BUILD THE RIGHT TECHNOLOGY FRAMEWORK

Smart cities depend on a robust infrastructure capable of delivering the reliable connectivity, sufficient bandwidth, on-demand data and application access, security and agility essential to sustainable success. CDW·G has the expertise, experience and comprehensive range of technologies to orchestrate the scalable, future-proof solutions required to help you make the smart community you envision a reality.

IoT PLATFORMS are at the heart of connected communities. They need to:

- Capture data from multiple networks of remote sensors
- Monitor, manage and control connected devices
- Analyze information and make it actionable

DATA CENTER modernization is a must in order to:

- Improve efficiency and performance
- Enable advanced analytics
- Support data distribution, management, exchange and integration
- Boost resilience and flexibility

STORAGE is critical for managing the massive data influx, requiring:

- High-volume, high-availability systems
- Multitier caching
- Intelligent storage controllers
- Cost-effective backup and disaster recovery

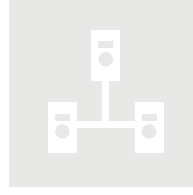

ENTERPRISE MOBILITY MANAGEMENT is essential for safeguarding mobile devices by:

- Ensuring access but mitigating risks to workspaces
- Protecting city and citizen data
- Securely delivering apps and content

SERVICES from CDW will optimize your technology investment with a:

- Data Center Assessment
- Data Center Quality of Service Roadmap
- Storage Solution Review
- IoT Envisioning Workshop

NETWORKING AND SWITCHING are key components to support:

- Ultrafast network service
- Uninterrupted connectivity
- Dependable communications

CONSIDERATIONS FOR BUILDING A FUTURE-PROOF INFRASTRUCTURE

To ensure your infrastructure is robust and agile enough to support the connectivity and performance your smart community needs, you need to invest in technology that can grow with you. Ask yourself:

- Do you have the networking capacity to keep pace with IoT-generated data?
- Is your computing power and speed capable of handling advanced analytics?
- Do you have sufficient bandwidth for communitywide access to data and applications?
- Are your legacy systems impeding your progress toward better connectivity?
- How confident are you that your security strategy safeguards your data and devices?

INFRASTRUCTURE FOR TOMORROW – TODAY. ORCHESTRATED BY CDW.

At CDW-G, we use our IT expertise, deep understanding of your needs and top technology partnerships to provide knowledgeable guidance for your smart community technology initiatives.

HARDWARE AND SOFTWARE SOLUTIONS

tailored to your specific smart community needs, including those that exist today and those you anticipate tomorrow

END-TO-END DATA CENTER SUPPORT

from assessment to deployment and beyond

TECHNOLOGY PARTNERSHIPS

that ensure you take advantage of the full range of emerging networking, security, storage and mobility options

DEEP KNOWLEDGE based on 30 years of serving as a trusted IT partner to U.S. municipalities of every size

PARTNERS WHO GET IT

aruba[®]

a Hewlett Packard Enterprise company
