CDW SERVICES:

MICROSOFT 365 SAAS SECURITY WORKSHOP

INCREASE THE SECURITY OF YOUR OFFICE 365 SOLUTION

The Microsoft 365 SaaS Security Workshop engagement helps educational institutions evaluate their current business security threat landscape as well as their existing Office 365 security controls to create an evidence-based roadmap to meet organizational needs. Additionally, this workshop will pilot advanced features and controls which allows customers the ability to mitigate numerous attack vectors that are prevalent today. Office 365 is fantastic technology that enables productivity, but too often it has set security to a one-size-fits-all format which, in today's fast-moving environment, can leave areas exposed.

The workshop also will cover both product as well as the solution's configuration best practices and associated recommendations. This will provide an evidence-based roadmap to ensure security, governance and compliance is uplifted into your Office 365 solution. This will benefit both highly regulated institutions and those who have concerns about increasing their cybersecurity posture beyond the default.

WHAT CAN CDW DO FOR ME?

Some of the products and tools covered in the Microsoft 365 SaaS Security Workshop include:

- Current Business and Technical Security landscape and requirements
- Secure Score
- Advanced Thread Protection (ATP)
- Advanced Data Governance
- Advanced eDiscovery
- Multi-factor Authentication
- Email Security
- Identity and Authentication Security
- Threat Tracker and Simulations

- Auditing and Access for Office 365
- Azure Sentinel (Preview) for Office 365
- SaaS Application Security, including:
  - Exchange Online and Hybrid* Lockdown
  - SharePoint / Teams
  - OneDrive For Business Ransomware protection
- Security Adoption and Change Management (ACM) for end users

THE BENEFITS

- Evaluate your current environment and security requirements
- Deep dive into your SaaS workloads and features that could improve security of Office 365 beyond the default
- Gain a better understanding of the "better together" Office 365 and Security features
- Identify potential risks or security gaps in the Office 365 and EMS environments and provide recommendations for addressing risks and security gaps
- Deep understanding of current security controls and compliance state via Secure Score, Secure Trust and alignment with NIST CSF
- Develop a roadmap plan on planning for security and compliance of Office 365, Windows 10 and EMS
- Enable and pilot non-intrusive Advanced Threat Protection (ATP) features, ransomware/ phishing controls and SMTP lockdown best practices
- Quickly enable users the ability to adopt advanced Security features in Office 365

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
